TABLE OF CONTENTS

		Page
1.	Spring 1980 Minnesota Soil Moisture Situation	1
2.	Development of Crop Calendars and Agroclimatic Data for Minnesota Crop Reporting (CRD)	17
	Becker Experiments	
3.	Controlling Soil pH for Potatoes Under Irrigation (Limy Water),1979	24
4.	Micronutrient Tests on Alfalfa	27
5.	Micronutrient Fertilization of Potatoes and Corn Under Irrigation	29
6.	Influence of Nitrogen Form, Nitrification Inhibitors, and Treatment Incorporation on Yields and Nitrogen Utilization of Corn Under Irrigation	33
7.	Influence of Nitrogen Rate, Timing of Nitrogen Application and Use of Nitrification Inhibitors for Irrigated Corn Production	37
	Crookston Experiments	
8.	1979 Weather Summary	41
9.	Effects of Nitrogen Carrier, Rate, and Application Date on Spring Wheat at Crookston - 1979	43
10.	Effects of Nitrogen and Phosphorus Application Methods on Spring Wheat - 1979	46
11.	Spring Wheat Fertilization - 1979	48
12.	Nitrogen Fertilization and Nitrogen Utilization by Fourteen Small Grain Varieties	50
13.	Soil Test Levels as Affected by Different Fertilizer Programs in a Continuous Wheat Cropping System	55
14.	Effects of Anhydrous Ammonia on Germination of Spring Wheat and Barley - 1979	57
15.	Phosphorus and Potassium Fertilizer Rate Studies on Malting Barley - 1979	59
16.	Effects of Micronutrients on Spring Wheat Grown on Organic Soils	61
17.	Residual Effects of Copper Applied on Organic Soils	63
18.	Effects of Nitrogen and Phosphorus Application Methods on Sugar Beets - 1979	64
19.	Comparison of Phosphorus Soil Test Method on a Bearden-Fargo Silty Clay Loam	65
	Lamberton Experiments	
20.	Twenty Years of Field Experimentation with Nitrogen Source, Placement, and Time of Application to a Webster Loam Near Lamberton	66
	Morris Experiments	
21.	Weather Summary -1979	71
22.	Continuous Corn Silage	72
23.	Effect of Fertilization on Corn Grain Yield and N Content of the Ear Leaves	73

Morris Experiments, Cont'd.

Page

24. Foliar Fertilization of Corn..... 78

25. Manure Rate Study..... 79

26. Residual Effect of Heavy Applications of Animal Manures on Corn Growth and Yield and on Soil Properties..... 86

27. Influence of Nitrogen Fertilization on Forage Production and Nitrogen Utilization by Three Small Grain Varieties..... 91

28. Nitrogen Fertilization and Nitrogen Utilization by Seven Small Grain Varieties..... 94

Rosemount Experiments

29. Pesticide Interaction Plots at Rosemount..... 98

Staples Experiments

30. Alfalfa and Red Clover Potassium Trials..... 99

31. Barley Fertilization Trials at Staples..... 104

32. Nitrogen Fertilizer Distribution Between Corn Plants, Soil and Aquifer Under Irrigated Condition..... 110

33. Influence of Nitrogen Rate, Form and Use of Extend on the Yields and Nitrogen Utilization of Corn Under Irrigation..... 112

34. Influence of Nitrogen Rate, Timing of Application and Use of Nitrification Inhibitors on Irrigated Corn..... 117

35. N Rate Studies of Dryland and Irrigated Wheat and Oats, Staples 1979.... 119

36. Phosphate Rate Studies of Irrigated and Dryland Wheat and Oats, Staples, 1979..... 126

37. Water Quality Studies..... 127

Waseca Experiments

38. Weather Data - 1979..... 133

39. Continuous Corn Tillage Study..... 134

40. N Rate, Source, and Incorporation Study - Corn..... 142

41. Rotation Nitrogen Study..... 144

42. Use of Terrazole (Dwell) as a Nitrification Inhibitor in Fall vs. Spring Nitrogen Application Programs for Corn Production in Southern Minnesota..... 147

43. Correcting Chlorosis of Soybeans by Foliar Application of Iron..... 149

44. Soybean Tillage - Herbicide Study..... 151

45. Planterra and Soil Inoculant..... 156

46. Symbex..... 159

Corn

47. Deep Sampling of Soils for Residual Nitrates and Its Potential as a Diagnostic Technique for Corn Production in Southwestern Minnesota..... 165

48. Eco-Gro Studies on Corn..... 170

Page

49. High Phosphorus and Potassium Rates for Continuous Corn..... 173

50. The Influence of Nitrate-Nitrogen in the Soil Profile on the Response of Corn to Nitrogen Fertilization in Southeastern Minnesota - 1979 and 1977-1979 Summary..... 180

51. Use of N-Serve in Fall vs. Spring Nitrogen Application Programs on Fine Textured Soils of Minnesota..... 186

Grass Seed

52. Grass Seed Production as Influenced by Fertilization..... 192

Navy Beans

53. Navy Bean Inoculation Trials - 1979..... 201

Pastures

54. Pasture Fertilization Trials..... 203

Soil Testing

55. Influence of Application of Liquid Cattle Manure on the Nutrient Level of Agriculture Soils in Jackson County, Minnesota - 1979..... 213

56. Yields and Quality of Sunflower and Wheat Crops as Influenced by Fertilizer Recommendations From Several Soil Testing Services..... 220

Soybeans

57. 1979 Soybean Foliar Fertilizer Studies..... 225

Sugarbeets

58. Nitrogen Fertilization on Sugarbeets in West-Central Minnesota-1979..... 226

Sunflowers

59. Fertilizer Trials on Sunflowers - 1979..... 234

60. Nitrogen, Phosphorus and Potassium Fertilizer Rate Studies on Sunflower - 1979..... 237

61. Nitrogen and Potassium Studies on Sunflowers in Pennington County, Minnesota - 1979..... 242

Sweet Corn

62. Nitrogen Fertilization of Irrigated Sweet Corn..... 246

Wheat

63. N Rate, Source, and Incorporation Study Wheat..... 249

64. The Yield and Protein Content of Era Wheat as Influenced by Starter Fertilizer at Several Farm Locations in Red River Basin of Minnesota - 1979..... 251

65. Yields of Winter Wheat on Fine-Textured Soil in Northern Minnesota-1979. 254

Wild Rice

66. Wild Rice Fertilization Research - 1979..... 256
