TABLE OF CONTENTS

Page

1. Minnesota Spring Soil Moisture Situation....1
2. Additional Remarks on Current Soil Moisture and Soil Temperature Conditions....3
3. Soil Moisture Profiles at Lamberton, Morris and Waseca....5
4. Hydrologic Year Precipitation, October 1979 - September 1980....5

Becker Experiments

5. Influence of Nitrogen Rate, Timing of Nitrogen Applications and Use of Nitrification Inhibitors for Irrigated Corn Production....9
6. Influence of Nitrogen Form Nitrogen Rate, Timing of Nitrogen Application and Nitrification Inhibitors for Irrigated Corn....14
7. High Corn and Soybean Yield Trials on the Coarse Textured, Irrigated Soils of Minnesota....18
8. Corn Yields from Varying Levels of Potash....27
9. Micronutrients Fertilization of Potatoes Under Irrigation....29
10. Controlling Soil pH for Potatoes Under Irrigation....33
11. Fertilizer Trial on Strawberries on an Irrigated Sand....35
12. Micronutrient Tests on Alfalfa....37
13. Soil Test Lab Comparison on Irrigated Corn....43

Crookston Experiments

14. Crookston Weather Summary....46
15. Use of N-Serve in a Spring Nitrogen Application Program on Corn....48
16. Residual Effects of Copper on Organic Soils....49
17. Phosphorus Fertilization of Sugarbeets....51
18. High Phosphorus and Potassium Rates on Spring Wheat....52
19. Effect of Potassium Fertilization on Spring Wheat....53
20. Effect of Nitrogen and Phosphorus Application Methods on Spring Wheat....54
21. Effects of Nitrogen Carrier, Rate and Application Date on Spring Wheat....55
22. Effect of Anhydrous Ammonia on Germination of Spring Wheat and Barley....56
23. Effects of Different Fertilizer Programs on Soil Test Levels in a Continuous Wheat Cropping System....57
24. Nitrogen Fertilization and Nitrogen Utilization by Fourteen Small Grain Varieties....59

Page

25. Nitrogen Incorporation Study on Wheat....62

Lamberton Experiments

26. Soil Moisture Probabilities....66

27. Twenty-one Years of Field Experimentation With Nitrogen Source, Placement, and Time of Application to a Webster Loam near Lamberton....67

28. Nitrate Correlation Study with Corn Following Corn, Soybeans and Wheat....70

Morris Experiments

29. Morris Weather Summary....72

30. Continuous Corn Silage....73

31. Manure Rate Study....74

32. Residual Effect of Heavy Applications of Animal Manures on Corn Growth and Yield and on Soil Properties....76

33. Nitrogen Fertilization and Nitrogen Utilization by Eight Small Grain Varieties....78

34. Influence of Nitrogen Fertilization on Forage Production and Nitrogen Utilization by Three Small Grain Varieties....81

35. Use of N-Serve as a Nitrification Inhibitor in Fall vs. Spring Nitrogen Application Programs for Corn Production in West Central Minnesota....83

36. Soil Test Lab Comparisons....85

Staples Experiment

37. Alfalfa and Red Clover Potassium Trials....90

38. Barley Fertilization Trials under Irrigation....96

39. Fertilizer Nitrogen Uptake by Irrigated Potatoes....101

40. Influence of Nitrogen Rate, Timing of Application and Use of Nitrification Inhibitors on Irrigated Corn....103

Waseca Experiments

41. Waseca Weather Summary....105

42. High Phosphorus and Potassium Rates for Continuous Corn....106

43. Liquid and Dry Starter Fertilizers for Corn in South-Central Minnesota....112

44. Rotation Nitrogen Study....115

45. N Rate, Source-Incorporation Study....117

46. Use of Dwell (terrazole) and N-Serve as Nitrification Inhibitors with Spring Application for Corn Production in Southern Minnesota....120

Page

47. Maximum Yield Demonstration....122

48. Conservation Tillage Study....126

49. Soybean Tillage-Herbicide Study....134

50. Correcting Chlorosis of Soybeans by Foliar Application of Iron....139

51. Soil Innoculant....141

52. Soil Test Comparison Study....144

Corn

53. Nitrate-Nitrogen in the Soil Profile and the Response of Corn to Nitrogen Fertilization in Southeastern Minnesota....152

54. Deep Sampling of Soils for Residual Nitrates and Its Potential as a Diagnostic Technique for Corn Production in Southwestern Minnesota....155

55. Sulfur and Magnesium Trial on Corn in Central Minnesota....157

56. Tillage Study Summary....161

Experimental Nitrogen Materials

57. The Effect of Three Nitrogen Products on Soil pH in the Greenhouse....165

58. The Effect of Three Nitrogen Products on Lawn Grass Growth and Nutrient Content....167

Grass Seed

59. Fertilization of Grasses Grown for seed Production....168

Pasture

60. Pasture Fertilization Trials....176

Sugarbeets

61. The Effect of Three Nitrogen Levels on Sugarbeet Variety Performance....185

62. Nitrogen Fertilization of Sugarbeets in West-Central Minnesota....198

Sunflowers

63. Starter and Broadcast Fertilizer Trials on Sunflowers....204

64. Sunflower Fertilization....206

65. Phosphorus and Potassium Fertility Studies on Sunflowers....208

66. Fertilizer Trials on Sunflowers....214

Wheat

67. Fertilizer Trials on Wheat on High Fertility Soils in Northwestern Minnesota....217

Page

68. Potassium on Wheat - Pennington County.....219

69. Copper and Manganese Fertilization of Wheat on an Organic Soil.....221

70. N-Rate, Source and Incorporation Study.....223

Wild Rice

71. Wild Rice Fertilization Research.....230
