Fall 1990 Soil Moisture 1

Water Year Climate Summary October 1989 - September 1990 7

The Low Temperature Events of Winter 1989 - 1990 10

Daily Pan Evaporation Across Minnesota 13

The Temperature Change on Days Following Measurable Precipitation 18

The Change in Air and Deep (42 feet) Ground Temperatures in Eastern Minnesota 21

Becker

Nitrogen and Boron Utilization by Potato: Effects on Tuber Quality and Implications for Groundwater Quality 23

Phosphorus Requirements for Irrigated Potatoes 41

Influence of Nitrogen and Potassium Fertilization on the Yield and Nutrient Accumulation of Four Different Corn Hybrids--1990 ...Becker Research Farm and S. Exp. Station 44

Crookston

1990 Weather Data, Northwest Experiment Station, Crookston, Mn 74

irect Comparison of Deep Nitrate-N Levels and Optimum N Fertilizer Rate 76

Primary Tillage Effects on Soil Susceptibility to Erosion After Sugarbeet Harvest 79

Nitrogen Effects on Quality of Selected Sugarbeet Varieties..... 80

Bright Sun on Spring Wheat and Sugarbeet 83

Lamberton

Residual Nitrogen Study at Lamberton 86

Thirty One Years of Field Experimentation with Nitrogen Source, Placement, and Time of Application to a Webster Clay Loam at the Southwest Experiment Station, Lamberton, Mn 89

The Erosion-Productivity Study at the Southwest Experiment Station, Lamberton, Mn 91

Management of Slopes Using Various Tillages, Tillage and Row Direction at the Southwest Experiment Station 93

Morris

West Central Experiment Station, Weather Summary - 1990 98

Continuous Corn Silage, Morris, 1990 99

Winter Urea Application on High pH Soils, Morris, 1990 101

Effect of Tillage and Subsoiling on Soil Water Recharge and Corn Yields, Morris, 1990 103

Morris, continued

Residual Effect of Heavy Applications of Animal Manures on Corn Growth, Yield and Soil Properties, Morris, 1990 110

Soybean Tillage Nitrogen Inoculum Study, Morris 1990 112

Staples

Comparing Barley and Corn Production Under Irrigated and Dryland Conditions 115

Tillage Effects on N Available to Irrigated Corn from Turkey Manure and Urea N Sources 117

Tillage Effects on N Available to Irrigated Corn from Alfalfa and Urea N Sources 128

Nitrogen Value of Red Clover Grown on a Sandy Soil 133

Corn Nitrogen Rate Study 135

Lupin Bean Fertility Study 136

Triticale Production 137

Water Quality Studies 138

Waseca

Weather Data - 1990, Southern Experiment Station Waseca, Minnesota 142

Nitrogen Loss to Tile Lines as Affected by Tillage 143

Nitrate Losses to Tile Drainage as Affected by Nitrogen Fertilization of Corn in a Corn - Soybean Rotation 146

Impact of Nitrogen and Tillage Management Practices on Corn Yield and Potential Groundwater Contamination in Southeastern Minnesota 154

Supplemental Application of N to Corn After Heavy Spring Rainfall 160

N Credits for Manure and Alfalfa 163

Corn and Soybean Production as Influenced by Bright Sun 166

Decline Rates of Soil Test P and K in a Corn-Soybean Rotation 171

Conservation Tillage for Corn and Soybean Production 173

Evaluation of the Effect of Potash Fertilizer Applied in Ridges on the Early Growth and Yield of Corn 178

Effects of Nutrient Sources, Application Timing and Rate on Alfalfa Production .....Rosemount and Southern Exp. Stations 180

Westport

Water Quality Research with Nitrogen at the Herman Rosholt Water Quality Research Farm , Westport, Mn. 1990 184

Residual Effects of Nitrogen Fertilizer Treatments and Tillage on Grain Yield, Uptake and NO_3^- Leaching in Irrigated Corn 195

Land Treatment of Sewage Sludge Incinerator Ash 198

Off Station Research

Corn

Urea Application Strategies on Corn Grain Yields and Stalk Nitrate - N Concentrations .....Isanti and Dakota Counties 208

Calibration and Correlation of Soil N Tests for Corn's N Recommendations.....South-central, Southeastern and East-central MN 212

Effect of Turkey Manure as a Nutrient Source on Corn Yields .....Rice County 222

Corn Yields as Affected by Nitrogen Rate, Legume and Manure Histories.....Freeborn, Mower, Rice and Steele Counties 229

Soybean and Soybean - Corn Rotations

Evaluation of Ammonium Sulfate as a Corrective Treatment for Iron Chlorosis in Soybeans .....Lyon, Redwood and Yellow Medicine Counties 233

The Evaluation of Banded Applications of Potash Fertilizer for Improved Corn and Soybean Production in a Ridge-Till Planting System.....Murray Co 235

Mechanical and Chemical Weed Control Demonstrations in Corn and Soybeans .....Mower and Steele Counties 237

Potato

Soil Nitrate Movement in Irrigated Potato/Corn Rotation .....Sherburne County 248

Evaluation of N-Hib and N-Fix on Potato Yield .....Potato Research Farm Grand Forks ND 261

Impact of Ag-lime on Soybean and Potato Production on Irrigated Sandy Soils.....Sherburne County 262

Forage

Evaluation of Liming Materials and Rate of Application for Alfalfa Production on Irrigated Sandy Soils .....Wadena County 263

Application of Liming Materials for Established Alfalfa.....Goodhue County 265

Turf

Recycling of Nitrogen from Turfgrass Clippings .....Ramsey County 267

Tillage

Effect of Tillage and Frequency of Liquid Dairy Manure Application on Corn Production: A Long Term Summary .....Goodhue County 269

Effect of Tillage and Frequency of Liquid Dairy Manure Application on the Availability of N to Corn, Soil N Distribution and N Concentration in Soil Water .....Goodhue County 276

Effect of Tillage and Source of Swine Manure on Soil N, Corn Yield, and N Uptake.....Goodhue County 291

Tillage and Time of Application Effects on Corn Response to Manure in Meeker County, MN 302

Tillage Effects on Soybean Response to Residual Effects of Manure in Stearns County, MN 309

Tillage Effects on Corn Growth, Stand Establishment, and Yield, Isanti County, MN 313

Tillage Effects on Continuous Corn in Dodge County, MN 317

Conservation Tillage, and Corn and Soybean Production in the Clearwater River Watershed: A Four Year Summary.....Meeker, Stearns and Wright Counties 319

Tillage Effects on Corn and Soybean Production in Meeker County, MN 328

Tillage Effects on Corn and Soybean Production in Wright County, MN 332

Tillage Effects on Soybeans Following Barley and Spring Wheat in Douglas County, MN 336
