1991 Precipitation Summary 1

Annual Precipitation Totals at Minnesota Agricultural Experiment Stations 5

1991 Soil Moisture at Three Sites 8

The Radiation Budget at St. Paul 9

The Positive and Negative Effects of the Recent "Benign Climate" 12

Climate Change and The Greenhouse Warming 20

The Inverse Relationship Between Temperature and Precipitation 22

Becker

Calcium Nitrate as a Source of Calcium and Nitrogen for Potato Production 23

Nitrogen Fertilization Studies on Irrigated Potatoes: Nitrogen Use, Soil Nitrate Movement, and Petiole Sap Nitrate Analysis for Predicting Nitrogen Needs 27

Phosphorus Requirements for Irrigated Potatoes - 1991 48

Crookston

Nitrogen Effects on Quality of Selected Sugar Beet Varieties 51

Lamberton

Thirty-Two Years of Continuous Corn with Variable Nitrogen Source, Placement, and Time of Application at the Southwest Experiment Station 56

The Erosion-Productivity Study at the Southwest Experiment Station 58

Tillage Management for Increasing Crop Yields and Decreasing Soil Erosion at the Southwest Experiment Station 61

Micro-Plot Pesticide Leaching and Runoff Study Under Conventional and Soil Specific Management .. 65

Morris

Weather Summary - 1991, West Central Experiment Station 69

Continuous Corn Silage 70

Effect of Tillage and Subsoiling on Soil Water Recharge and Corn Yields 72

Residual Effect of Heavy Applications of Animal Manures on Corn Growth, Yield, and Soil Properties 77

Effect of Nitrogen Application Rate on Grain Yield in Corn and Soil Water Nitrogen in Morris, MN 79

Matching Precision Placement of Potash Fertilizer to Root Growth Dynamics in a Ridge-Till Planting System 89

Staples

Tillage Effects on N Available to Irrigated Corn from Alfalfa - Five Year Summary 96

Tillage Effects on N Available to Irrigated Corn from Alfalfa and Urea N Sources..... 100

Tillage Effects of N Available to Irrigated Corn From Turkey Manure and Urea N Sources 109

Nitrogen and Irrigation Management Effects on Corn / Potato Yields and Nitrate Leaching 119

Corn Nitrogen Rate Study 128

Lupin Bean Fertility Study 129

Triticale Production 131

Water Quality Studies 133

Waseca

Weather Data - 1991, Southern Experiment Station Waseca, Minnesota 135

Nitrogen Loss to Tile Lines as Affected by Tillage 137

Nitrate Losses to Tile Drainage as Affected by Nitrogen Fertilization of Corn
in a Corn - Soybean Rotation 140

Impact of Residual Soil Nitrate on Corn Production 147

Decline Rates of Soil Test P and K in a Corn-Soybean Rotation
Southern and West Central Experiment Stations 150

Nitrate and Pesticide Losses to Tile Drainage, Residual Soil N, and N Uptake as
Affected by Cropping Systems ...Southern and Southwest Experiment Stations 154

N Credits for Manure and Alfalfa, Southern Experiment Station and Rosemount Experiment Station ... 160

Westport

Water Quality Research with Nitrogen at the Herman Rosholt Water Quality
Research Farm , Westport, Mn. 1991 166

Use of the SPAD 502 Chlorophyll Meter to Monitor the Nitrogen Status of Corn 174

Impact of Turkey Manure Application on Corn Production and Potential Water Quality Concerns
on Estherville Sandy Loam 177

Corn

Calibration and Correlation of Soil N Tests for
Improved N Recommendations.....South-central, Southeastern and East-central MN 181

Fertilizer N Response in a Continuous Corn System
Southern (Waseca) and Rosemount Experiment Stations 188

Nitrogen Specific Management by Soil Condition, Redwood and Sherburne Co. 190

Agricultural Utilization of Nutralime: On Farm Demonstration Plots
Isanti, Dakota and Washington Counties 194

Impact of Nitrogen and Tillage Management Practices on Crop Yield and Potential
Groundwater Contamination in Southeastern Minnesota 217

Alfalfa

Effects of Nutrient Sources, Application Timing and Rate on Alfalfa (and Subsequent Corn) Production. Southern (Waseca) and Rosemount Experiment Stations 223

Residual Effects of Potash and Alfalfa Management on Corn Production Rosemount Experiment Station 227

Tillage

Effects of Tillage and Frequency of Liquid Dairy Manure on N Availability to Corn .....Goodhue County 229

Tillage Effects on Corn and Soybean Production, and Water Quality in Meeker County, MN 233

Tillage and Time of Manure Application Effects on Corn Response and Losses of Manure N and P at Meeker County, MN 248

Tillage Effects on Corn Response to Manure at Stearns County, MN 268
