2014 Southern Minnesota Regional Research and Demonstration Summary

I want to thank our many partners in making this research report possible. University of Minnesota Extension and the research team including Faculty from Extension, the Research and Outreach Centers at Waseca, Lamberton and Rosemount, and the Campus, have worked to ensure these field research trials are directly applied and adapted to the local region and address the complex needs of Southern Minnesota production agriculture. The regional producers, industry sponsors and state and county partners who have provided land, financial contributions and expertise to make these research trials possible are very much appreciated.

Crop Management Tours, such as those conducted at Rochester and Waseca, provide hands-on events that bring meaning and an applied perspective to the crop trials. These tours give producers and industry professionals the opportunity to ask questions and have one-on-one time with University of Minnesota researchers and Extension Educators.

The many student interns involved in this important research are our workforce of the future! Their summer academic experience provides opportunities to accelerate their own professional careers and give them hands-on experiences working with Minnesota agriculture. We are actively promoting future projects and collaboration that will provide additional experiences with University of Minnesota Extension for students and future leaders of Minnesota.

Extension is committed to providing Minnesotans working in production agriculture with faster and more comprehensive access to the research and resources of the University through specialized educators at our Regional Offices.

This report is exemplary of the University’s commitment of providing timely and relevant research results. Again, congratulations to all partners involved!

Together, you and Extension continue to make a difference in Minnesota.

Respectfully,

Chuck Schwartau
Regional Director – Southeast

Dr. LuAnn Hiniker
Regional Director - Southeast
TABLE OF CONTENTS

BACKGROUND INFORMATION

- Rainfall and Growing Degree Data at Rochester, MN
  - Links to Additional Weather information:
    - Waseca: [http://sroc.cfans.umn.edu/WeatherInformation](http://sroc.cfans.umn.edu/WeatherInformation)
- Team Members

CORN

HYBRID

- Minnesota Hybrid Corn Silage Performance Trials (Houston, Olmsted, Stearns, and Otter Tail Counties)
- Minnesota Corn Performance Trials (State Trials)
  - LINK: [http://sroc.cfans.umn.edu/prod/groups/cfans/@pub/@cfans/@sroc/@research/documents/article/cfans_article_491852.pdf](http://sroc.cfans.umn.edu/prod/groups/cfans/@pub/@cfans/@sroc/@research/documents/article/cfans_article_491852.pdf)
- SE Minnesota Regional Performance of Early Maturity (90 to 95 day) Corn Hybrids (Waseca County)
- SE Minnesota Regional Performance of Mid-Season Maturity (96 to 100 day) Corn Hybrids (Waseca County)
- SE Minnesota Regional Performance of Late Maturity (101 to 107 day) Corn Hybrids (Waseca County)
- SE Minnesota Regional Performance of Conventional (92 to 106 day) Corn Hybrids (Waseca County)

HERBICIDE

- 2012-2014 Time of Weed Removal in Corn: A Field Teaching Tool – Seeing is Believing
- Evaluation of Acuron and A20540 Herbicide Performance
- Giant Ragweed Control with Diflexx Herbicide
- Evaluating the effectiveness of pyroxasulfone based herbicide Anthem and tank mixtures with other potential broadleaf herbicides for improved weed control
- 2014 Evaluation of Herbicide Systems
- 2014 Corn Herbicide Evaluation – SWROC at Lamberton and SROC at Waseca

AGRONOMY

- Variable Rate Nitrogen Trial
SOYBEAN

Section D

VARIETY

- SE Minnesota Regional Performance of Early Maturity (1.3 to 1.8) Glyphosate Tolerant/Roundup Ready® (GT/RR) Soybean Varieties (Olmsted and Waseca Counties)
- SE Minnesota Regional Performance of Late Maturity (1.9 to 2.5) Glyphosate Tolerant/Roundup Ready® (GT/RR) Soybean Varieties (Olmsted and Waseca Counties)

Section E

HERBICIDE

- 2012-2014 Time of Weed Removal in Soybean: A Field Teaching Tool – Seeing is Believing
- Weed Control with PRE and POST systems with Anthem Herbicide
- Evaluation of Weed Control in Soybean with Tolerance to the Herbicides mesotrione, glufosinate, and isoxaflutole
- Evaluation and Comparison of Pummel Herbicide to Local Standards in SE Minnesota
- Glyphosate and ALS Resistant Giant Ragweed Control
- 2014 Evaluation of Herbicide Systems
- 2014 Soybean Herbicide Evaluation (SWROC at Lamberton, Rochester, and SROC at Waseca)

LINK: http://appliedweeds.cfans.umn.edu/research.html

Section F

AGRONOMY

- Field demonstration to show the impact of delayed planting on giant ragweed densities in soybeans at Rochester, MN in 2014
- Soybean Response to Micronutrients in NW Minnesota
- A 2014 multi-site field study on the effects of Clariva seed treatment on soybean yield and Soybean Cyst Nematode reproduction
- Herbicide Management and Resistant Giant Ragweed Educational Videos
