

TABLE OF CONTENTSPAGEClimatological Notes

1. Some Climatological Notes, Fall 1967 1

Microclimate Studies at Park Rapids-Swan

2. Microclimate Studies at the Park Rapids Sulfur Experimental Field 20

Available Soil Moisture Survey - 1967

3. Available Soil Moisture Survey - 1967 - Northwest Experiment Station Crookston, Minnesota 27

Soil Physics

4. Method of Corn Planting Study - University of Wisconsin Experiment Farm 30
5. Land Forming - Northwest Experiment Station - 1967 32

Herbicide Residues

6. Soil Residue Studies 34

Lime Experiments

7. Lime Plots, Lamberton, 1967 38

Rosemount Experiments

8. Rosemount Soils Farm, General Conditions and Results 42
9. Corn in Crop Rotation System 44
10. Continuous Corn Cropping System 45
11. Corn and Soybean Fertilization With Broadcast 49
12. Broadcast Plow-Down Fertilizer Placement With Band and Band Plus Sidedressed Nitrogen on Continuous Corn and Corn in a Crop Rotation System 53
13. Lime and Manure on Continuous Corn - 1967 56
14. Fertilized Alfalfa Yields 57
15. Continuous Corn - High Fertility Experiment 59

Morris Experiments

16. Weather Summary - 1967 62
17. Comparison of Phosphorus Sources 63
18. Use of Varying Rates of Nitrogen and Starter on Corn in 1967 65
19. Phosphorus and Potassium Fertilization of Alfalfa 66
20. Phosphorus Fertilization of Continuous Corn 68
21. Zinc Fertilization of Continuous Corn 69
22. Continuous Corn Silage 70
23. Corn Irrigation Experiment 71

TVA Demonstration Activities

24.	TVA Test Demonstration Activities	72
	<u>Irrigation and Fertility Levels for Corn & Alfalfa</u>	
25.	Effect of Irrigation, Fertility Level and Plant Population on Corn and Alfalfa at Park Rapids, Minn.	79
	<u>Nitrogen Experiments</u>	
26.	The Effect of Nitrogen Source, Placement, and Time of Application to a Webster Clay Loam at Lamberton on 1960-67 Ear Corn Yields and on 1967 Corn Composition	83
27.	Nitrate Nitrogen Content of a Barnes Loam Soil at Morris in November, 1967, after Eleven Years of Continuous Corn with Varying Rates of Nitrogen Fertilization	90
28.	The Effect of Fertilization on Soil Reaction	93
	<u>Phosphorus</u>	
29.	1967 Phosphorus Placement Study	94
30.	Polyphosphate Investigations	98
	<u>Secondary and Micronutrient Elements</u>	
31.	The Effect of Boron, Phosphorus & Potassium on Soluble Soil Boron & Yield of Grass-Legume Hay on a Vilas Loamy Sand in Carlton County 1965-66-67	100
32.	Experiments with Zinc for Corn in Southeastern Kandiyohi County	103
33.	The 1966-67 Results of a Zinc Source and a Zinc-Phosphate Interaction Effect on Leaf Composition and Corn Yield on a Calcareous Loam in Swift County	106
34.	Micronutrient Uptake by Soybeans	111
35.	Sulfur Investigations on Soils and Crops	113
	<u>Soybean Inoculation Studies</u>	
36.	Soybean Inoculation Studies	123
	<u>Sugarbeet Rotation Study at Crookston</u>	
37.	Sugarbeet Rotation Study - 1967	125
	<u>Potato Fertilization</u>	
38.	Potato Fertilization on Sandy Loams	126
39.	Magnesium Experiments	128
40.	Phosphorus Studies	129
41.	Nitrogen Studies	129

Oil Crop Fertilization

- | | | |
|-----|-------------------------------------|-----|
| 42. | Fertilizer Trials on Oil Crops | 130 |
| 43. | 1967 Sunflower Fertility Experiment | 133 |

Sugar Corn & Sorghum Studies at Waseca

- | | | |
|-----|---|-----|
| 44. | Agronomic Studies with Sugar Corn and Sorghum | 135 |
|-----|---|-----|

Alfalfa Fertilization

- | | | |
|-----|--|-----|
| 45. | Fertilizing Alfalfa in Morrison County Minnesota | 138 |
|-----|--|-----|

Fertilization for Grass Seed

- | | | |
|-----|--|-----|
| 46. | Grass Seed Production and Fertilizer Needs | 142 |
|-----|--|-----|

Soil Testing

- | | | |
|-----|---------------------------------------|-----|
| 47. | Soil Testing in Minnesota during 1967 | 146 |
|-----|---------------------------------------|-----|
