

<u>TABLE OF CONTENTS</u>	<u>PAGE</u>
<u>Climatological Notes</u>	
1. Some Climatological notes, fall 1968	1
2. Weather summary, Southwest Experiment Station, Lamberton - 1968	12
<u>Soils Physics</u>	
3. Method of corn planting study - University of Wisconsin Experiment Farm	15
4. Land forming experiment - Northwest Experiment Station, 1968	17
5. Field experiment with asphalt soil barriers (22" deep) on sandy soils in Sherburne county (Elk River) 1968.	19
6. Water content of a free draining Hubbard loamy coarse sand	24
7. Water content of a free draining Zimmerman fine sand	25
<u>Herbicide Residues</u>	
8. Soil pesticide residue studies.	26
<u>Lime Experiments</u>	
9. Lime plots, Lamberton, 1968	30
10. Fertilizer and lime trials at Pierz, Morrison county, Minnesota 1968	32
<u>Rosemount Experiments</u>	
11. Rosemount soils farm, general conditions and results	35
12. 40 versus 30 versus 20 inch row spacing for corn	36
13. Early versus late planting for corn	39
14. Continuous corn cropping system	41
15. Corn and soybeans in a crop rotation system	41
16. Lime on continuous corn	44
17. Fertilized alfalfa yields	44
18. Alfalfa versus Birdsfoot Trefoil in pasture mixtures	50
19. Fall versus spring pasture renovation	52
20. Continuous corn - high fertility experiment	54

Morris Experiments

21. Weather summary - 1968	56
22. Use of varying rates of nitrogen and starter on corn in 1968	57
23. Use of seed incorporated (pop-up) fertilizer	57
24. The effect of fertilizer placement at different broadcast rates on corn yields at Morris in 1968	58
25. The effect of starter rate and placement of five broadcast rates	58
26. Effect of high rates of phosphate with and without zinc on corn yields	59
27. Phosphate fertilization of continuous corn	59
28. Zinc fertilization of continuous corn	60
29. Continuous corn silage	61
30. Corn irrigation experiment	62
31. Phosphate and potash fertilization of alfalfa	65

Waseca Experiments

32. Foliar application of micronutrients to soybeans	67
33. 1968 zinc sources trial for field corn	69
34. Fertilizer placement study on corn 1968	70

Nitrogen Experiments

35. The effect of nitrogen source, placement and time of application to a Webster clay loam at Lamberton on 1960-68 corn yields and the nitrogen content of the corn grain	71
36. The effect of eleven years of annual application of nitrogen for continuous corn on soil reaction and on zinc concentration in the sixth corn leaf at silking, Morris 1968	76
37. Concentration of nitrate nitrogen ( $\text{NO}_3\text{-N}$ ) in free soil water in Webster clay loam subsoil at Lamberton under and adjacent to continuous corn with annual nitrogen fertilization	78
38. Soybean nitrogen fertilization study at Morris, Waseca, Lamberton, Grand Rapids and Crookston	83

Polyphosphate Investigations

39. 1968 Polyphosphate investigations	86
---------------------------------------	----

	<u>Potassium Experiment</u>	<u>PAGE</u>
40.	Effect of potassium fertilizer sources and rates on soybeans at Elk River	92
	<u>Fertilizer placement and time of application experiments</u>	
41.	Soybean fertilizer placement study at Lamberton, Morris and Waseca	98
42.	Effect of winter versus spring fertilization at Rosemount and Lamberton.	105
	<u>Secondary and Micronutrient Elements</u>	
43.	Sulfur investigations on soils and plants in Minnesota	108
44.	Zinc trials on sugarbeets - 1968 Northwest Experiment Station at Crookston	112
45.	Effect of iron and zinc chelates for flax at Crookston, in 1968	115
46.	The effect of high rates of zinc deficient soil in Swift county on corn growth and leaf zinc concentration in 1968	117
47.	The 1966-67-68 experiments on effect of zinc sources and zinc phosphate interaction on corn leaf composition and grain yield on a calcareous loam in Swift county	118
48.	Effect of micronutrient additions for soybeans on seed yield at Big Lake, Lamberton, Waseca, Morris and Rosemount	125
49.	The effect of zinc and phosphate application on zinc and phosphorus concentration in corn leaves and ear on corn yield of two farm fields in Stevens and Traverse counties	126
50.	A survey of micronutrient additions to corn in southwest Minnesota	128
51.	Cobalt content of Minnesota soils, legumes and grasses	136
	<u>Soybean Inoculation Studies</u>	
52.	1968 soybean inoculant testing program at Rosemount, Waseca, Lamberton, Morris and Big Lake	141
53.	Soybean variety - <u>Rhizobium japonicum</u> interaction studies at Crookston and Grand Rapids	146
	<u>Sugarbeet Experiments at Crookston</u>	
54.	Sugarbeet rotation study - 1968	149
55.	Alfalfa removal versus plow-under for sugarbeets in 1968	151
	<u>Potato Fertilization</u>	
56.	Soil fertility experiments on potatoes	152

Oil Crop Fertilization

57. Fertilizer trials on oil crops, Northwest Experiment Station, Crookston, 1968 155
158. Summary of 1968 soil fertility work on sunflowers at Rosemount, Elk River and Grand Rapids 158

Park Rapids Experiments

59. Yield potentials on a Doreset sandy loam, 1968 159
60. The effect of variety and population on corn yield 161

Salt Application Experiment

61. The effect of salt applications to an Ostrander silt loam at Rosemount and to a Webster clay loam at Lamberton on soil conductivity, plant population, and yields of Hark and Chippewa 64 soybeans in 1968 168

Fertilization for Grass Seed

62. Trace element study with Kentucky bluegrass and timothy, 1968- Roseau and Lake of the Woods counties 172

Soil Testing

63. Soil testing in Minnesota during 1968 177
