Residual Effect of Heavy Applications of Animal Manures on Corn Growth and Yield and on Soil Properties .......................................................... 55

**Staples**

Management of Boron for Corn Production on Irrigated Sandy Soils in Minnesota .......................................................... 60

Corn-Soybean Rotation ........................................................................... 62

Triticale-Rye Studies ............................................................................. 66

Water Quality Studies ........................................................................... 68

Lupin Bean Study .................................................................................. 69

Lupin Lime and Sulfur Amended Study ................................................. 71

**Waseca**

Southern Experiment Station, Waseca, Minnesota Weather Data - 1987 .......................................................... 74

Nitrate Losses to Tile Drainage as Affected by Nitrogen Fertilization of Corn in a Corn-Soybean Rotation .................................................. 75

Split Application of N for Corn on a Webster Soil ................................ 80

Nitrogen Losses to Tile Lines as Affected by Tillage ............................. 82

Soil Test Comparison Study ................................................................ 90

Conservation Tillage for Corn and Soybean Production ....................... 94

Tillage Systems for Corn and Soybean Crop Sequences ..................... 99

Planting Date, Nitrogen Fertilizer, and Plant Population Interactions in Processing Sweet Corn ...................................................... 102

**Westport**

Water Quality Research with Nitrogen at the Herman Rosholt Irrigation Farm, Westport, MN .......................................................... 106

Land Treatment of Sewage Sludge Incinerator Ash ............................... 112
Corn

Liquid Starter Fertilizer Comparison .......................................................... 121

Influence of Nitrogen and Potassium Fertilization on the Yield and Nutrient
Accumulation of Four Different Corn Hybrids ........................................... 122

Influence of Crop History and Manure Use on Nitrogen Rates for Corn Production in Southeastern MN .......................... 147

Decline Rates of Soil Test P and K in a Corn-Soybean Rotation ................... 153

Contamination in Southeastern Minnesota .................................................. 155

Wheat

Nitrogen Sources, Rates and Time of Application for Hard Red Spring Wheat .... 161

Response of Spring Wheat to Rate of Nitrogen and Time of Application ........ 165

Sulfur

Effect of Broadcast Sulfur on Corn Yield in Southeast MN .......................... 169

Application of Sulfur in a Starter Fertilizer for Corn Production on Silt Loam Soils . 171

Fertilizer Placement

Evaluation of the Relationship Between Tillage and Placement of P and K in a
Corn-Soybean Rotation ............................................................................. 174

Effect of Rate and Placement of Potassium on Growth and Yield of Corn .......... 178

Evaluation of the Efficiency of Band Placement of P Fertilizer for Corn, Soybeans, and Wheat ......................................................... 181

Potatoes

Effect of Gypsum and Boron Amendments on Potato Yield and Incidence of Internal
Tuber Quality Disorders ........................................................................... 189

Strawberries

Monitoring Spring Nitrogen Status of Strawberries .................................... 194

Radishes

Preliminary Evaluation of Carbosan Sequestered Copper and Manganese as Micronutrient Sources
for Radish Production on Organic Soils .......................................................... 196
Tillage

Corn - Tillage Residue Management, Lancaster, 1987 .............................................................. 204

Tillage Effects on Corn Production in Northeastern MN .............................................................. 211

Investigations of Tillage and Corn Hybrid on a Pachic Udic Haploboroll Soil in Western MN ..... 215

The Effect of Tillage on Small Grain and Soybean Production in Northwestern MN, 1987 ............ 217

Tillage Effects on Winter and Spring Wheat, Barley, and Soybean Production on the Lacustrine Soils of Northwestern MN ................................................................. 223

Conservation Tillage Corn and Soybean Research in Southeastern MN, 1987 .................................. 236

Tillage Effects on Corn and Soybean Production in the Clearwater River Watershed Meeker, Stearns, and Wright Counties, 1987 ................................................................. 246

Tillage, Nitrogen, Corn Hybrid, Soybean Variety and Soybean Seed Treatment Effects on Yields at Morris, Lamberton, and Waseca MN, 1986 and 1987 ........................................ 261

The Effect of Tillage on the Nitrogen Response by Corn Following Alfalfa .................................... 269

Effect of Tillage and Application of Swine Manure on Corn Yield .............................................. 274

Effect of Tillage and Frequency of Manure Application on N Uptake and Corn Yield 1985-1987 Summary ................................................................. 276
