	<u>Page</u>
Climate and Climatology, 1989	1
<u>Becker</u>	
Nitrogen and Boron Utilization by Potato: Effects on Tuber Quality and Implications for Groundwater Quality	12
<u>Crookston</u>	
1989 Weather Data, Northwest Experiment Station, Crookston, Mn	31
Zinc Application on Sugarbeet 1988-1989	33
Phosphorus Application on Sugarbeet 1987-1989	36
Comparison of Spring-Applied DCD-Urea and Urea of Hard Red Spring Wheat in Northwestern Minnesota	39
<u>Lamberton</u>	
Residual Nitrogen Study at Lamberton	42
Thirty Years of Field Experimentation with Nitrogen Source, Placement, and Time of Application to a Webster Clay Loam at the Southwest Experiment Station, Lamberton, Mn	44
The Erosion-Productivity Study at the Southwest Experiment Station, Lamberton, Mn	46
Management of Slopes Using Various Tillages, Tillage and Row Direction at the Southwest Experiment Station	48
The Retention of Nitrogen Fertilizer Applied During the Winter, Southwest Experiment Station, Lamberton, Mn	52
Soil Specific Management	54
The Effect of Tillage and Corn Hybrid on Available Potassium, Moisture Stress, and Yields at Lamberton, Minnesota, 1988 and 1989	60
<u>Morris</u>	
West Central Experiment Station, Weather Summary - 1989	66
Foliar UAN Concentrations on Hard Red Spring Wheat, Morris 1989	67
Chloride Fertilizer on Spring Wheat, Morris, 1987-89	69
Winter Urea Application on High pH Soils, Morris, 1989	72
Continuous Corn Silage, Morris, 1989	73
Effect of Tillage and Subsoiling on Soil Water Recharge and Corn Yields, Morris, 1989	75
Residual Effect of Heavy Applications of Animal Manures on Corn Growth, Yield and Soil Properties, Morris, 1989	82

Morris, cont.

The Effect of Tillage and Corn Hybrid on Nitrogen Response by Continuous Corn: a Six Year Summary	84
--	----

Staples

Nitrogen Management for Corn Production on Irrigated Sandy Soils	93
Lupin Bean Fertility Study	95
Water Quality Studies	96

Waseca

Weather Data - 1989, Southern Experiment Station Waseca, Minnesota	97
Nitrogen Loss to Tile Lines as Affected by Tillage	98
Residual Soil Nitrate in Second Year Corn Following Alfalfa as Influenced by Tillage and Corn Hybrid	101
Impact of Nitrogen and Tillage Management Practices on Corn Yield and Potential Groundwater Contamination in Southeastern Minnesota	105
Tillage Systems for Corn and Soybean Crop Sequences, Waseca, 1989	110
Conservation Tillage for Corn and Soybean Production, Waseca, 1989	113
Decline Rates of Soil Test P and K in a Corn-Soybean Rotation	116

Westport

Water Quality Research with Nitrogen at the Herman Rosholt Water Quality Research Farm , Westport, Mn. 1989	118
The Impact of Residual Fertilizer Treatments and Tillage on Soybean Yields and NO ₃ ⁻ Leaching	129
Land Treatment of Sewage Sludge Incinerator Ash	131

Off Station ResearchCorn

Urea Management--Rate and Time of Application and Nitrification Inhibitors--for Corn Production.....River Falls, WI	140
Influence of Nitrogen and Potassium Fertilization on the Yield and Nutrient Accumulation of Four Different Corn Hybrids--1989	Becker Research Farm and S Exp. Station 145
Evaluation of the Effect of Potash Fertilizer Applied in Ridges on the Early Growth and Yield of Corn	S Exp. Station 175
Banded Application of Potash Fertilizer for Corn in a Ridge Till Production System	Murray County 176
Field Evaluation to Determine Best Fluid Starter Ratios for Corn	Renville and McLeod Counties 181

Corn, cont.

Precision Placement for Improved Efficiency of Phosphate Use when Growing Corn with a Ridge-Till Planting System	WC and SW Exp. Stations	188
Evaluation of the Bray and Olsen Soil Test Procedures for Predicting Phosphate Fertilizer needs for Corn	Renville County	196
Evaluation of Fertilizer Recommendations from Two Soil Testing Laboratories in Watonwan County	Watonwan County	199
Influence of Experimental Designs on On-Farm Trial Interpretations		201

Soybean

Evaluation of Combinations of Potassium Fertilizer, Variety, and Fungicide Use on Production of High Yielding Soybeans in Minnesota	Mower County	204
Impact of Ag-Lime on Soybean and Potato Production on Irrigated Sandy Soils	Sherburne County	210

Potato

Soil Nitrate Movement in Irrigated Potato/Corn Rotation	Sherburne County	211
Evaluation of N-hib as a Nitrogen and Calcium Source for Potatoes	Becker Mn and Grand Forks ND Research Farms	221

Wheat

Nitrogen Sources, Rates and Time of Application for Hard Red Spring Wheat	NW and WC Exp. Stations	225
Nitrogen and Sulfur Fertilization of Hard Red Spring Wheat in Goodhue County	Goodhue County	229

Forage

Effects of Nutrient Sources, Application Timing, and Rate on Alfalfa Production (and subsequent Corn Crops)	Rosemount and S Exp. Stations	232
Use of Nitro Alfalfa in Southern Minnesota	Olmsted County	236
Influence of Potassium and Sulfur on the Yield of Red Clover	Staples Research Farm	240

Sugarbeet

Nitrogen Application for High Quality Sugarbeet in Southern Minnesota	Renville County	244
---	----------------------	-----

Grape

Nitrogen Fertility Studies on Grapes	Excelsior and Hastings, Mn	246
--	---------------------------------	-----

Lime

Evaluation of the Land Application of High Rates of By-Product Lime	Becker, Mn Research Farm and Chisago and Isanti Counties	250
--	---	-----

Tillage

Deep Tillage and Tillage System Effects on Corn Growth and Yield on an Aquic Soil	Dodge County	261
Tillage System Effects on Nitrogen Availability and Small Grain Growth and Yield	Douglas County	264
Tillage System and Cultivation Effects on Corn Growth and Yield on a Well Drained Silt Loam Soil	Fillmore County	266
Tillage System Effects on Corn Growth and Yield in East Central Minnesota	Pine and Isanti Counties	270
Tillage Effects on Corn Growth and Yield on a Somewhat Poorly Drained Fine Textured Soil	Steele County	274
Tillage Effects on Corn and Soybean Growth and Yield on Aquic Soils	Meeker County	276
Tillage Effects on Corn and Soybean Growth and Yield on Coarse Textured Soil	Wright County	280
Tillage Effects on Availability of Fresh and "Manure Pack" Sources of Dairy Manure on a Coarse Textured Soil	Stearns County	283
Effect of Tillage and Frequency of Liquid Dairy Manure Application on the Availability of N to Corn, Soil N Distribution and N Concentration in Soil Water	Goodhue County	291
Effect of Tillage and Source of Swine Manure on Soil N, Corn Yield, and N Uptake	Goodhue County	301
Tillage System Effects on Corn and Soybean Growth and Yield on a Well Drained Silt Loam Soil	Wabasha County	313
Tillage System, Applied Nitrogen, and Cultivation Effects on Corn Growth and Yield on a Well Drained Silt Loam Soil Following Alfalfa	Winona County	316
Tillage System Effects on Corn Phenology Nitrogen Response, and Yield Under Irrigation	Wadena County	325
The Effect of Tillage on Corn Phenology and Response to Applied Nitrogen Following Alfalfa Under Irrigated Conditions: a Three Year Summary	Wadena County	331
Corn-Tillage Residue Management, Lancaster, Wl. 1989	Lancaster, Wl	345
