2. See appendix A for a summary of research on why out of school time opportunities matter.
3. Since analyses of the data indicated that the factors noted above were generally more important in understanding the results than simply which region of the state a person resided, this report does not contain data by region. Separate summaries of the data for each of the eight regions are, however, available on the web at <http://www.extension.umn.edu/appliedyouthresearch>.
