Measuring Flour

This is the WRONG way to measure flour. Scooping will pack the flour into the cup.

**STEP 1** Lightly spoon the flour directly into the measuring cup.

**STEP 2** Keep spooning the flour into the cup until it mounds.

**STEP 3** Level off the top with a flat edged utensil, such as a table knife.

**STEP 4** Make a true level surface. Do not simply pack down.

**WHAT DOES FLOUR WEIGH?**

4 cups = about 1 lb
