OFFERING HOME GARDENERS AND COMMERCIAL GROWERS RELIABLE INFORMATION AND RESOURCES

The problems facing commercial growers and landscapers can be different, at least in scope, from those that challenge home gardeners, but a common denominator is the desire for healthy, beautiful, and reliable vegetables, flowers, fruits, trees, shrubs, and grasses. University of Minnesota Extension horticulture experts can help with advice and resources regarding planting, cultivation, pest and disease identification and control, and much more. In addition to local and regional educators and University faculty, Extension horticulture programming is expanded through the Master Gardener program.

WHAT WE OFFER

For commercial fruit and vegetable growers:
education on topics such as selecting
varieties, integrated cropping, marketing,
and season extension

For beekeepers: education on topics such as
honeybee diseases and pests and successful
queen rearing

For Master Gardeners: core course training,
continuing education, opportunities to
collaborate on research

For nursery and greenhouse professionals:
education on topics such as propagation, pruning, fertilizers,
pest and weed control, and sustainable businesses

For turfgrass professionals: education on topics such as
fertilizers, variety selection, and weed management

For home gardeners: online and in-person help with
diagnosing and treating plant problems, controlling
household insects, choosing plants, low-maintenance
lawns, and more.
