# Mold Remediation Course

**April 24-25 • 8am - 4pm**  
**University of Minnesota - East Bank Campus**

**COST: \$400**

This course provides an overview of activities involved with mold remediation. Participants will gain an understanding of mold ecology, health effects and how to conduct an initial inspection. Participants will learn about conducting a visual inspection and how to use non-invasive tools such as infrared cameras and moisture meters. Students will learn:

- sampling techniques available to find hidden mold and the limitations of these techniques
- how to identify the most common fungi related to water damage
- how design a mold remediation containment and understand the safety considerations
- methods to prevent water events and mold growth in buildings
- the legal requirements for applying antifungal agents in Minnesota.

Continuing Education Units provided.
